Project full title: Multiscale Applications on European e-Infrastructures.

Grant agreement no.: 261507

Due-Date:	Month 24
Delivery:	Month 24
Lead Partner:	PSNC
Dissemination Level:	PU
Status:	Draft
Approved:	
Version:	2.6

Summary of changes in D5.1

The document D5.1 is periodically extended by adding relevant descriptions of further deployments of MAPPER middleware services. During the last reporting period the document has been modified in the following way:

PM 24 (version 2.4)

1. Short technical descriptions of new services: Saga BIG Jobs and MTO have been added.
2. The MAPPER testbed and Deployed services sections were updated along with the matrix presenting the current status of deployed middleware services on EGI and PRACE sites. A new column was added to include the following new sites:
   a. EGI: Galera+, Hydra, Inula, Nova.
   b. PRACE: Cane, HECToR, HERMIT, Huygens.
   c. Local resources.
3. A new section "Best Practices and Installation Instructions" was added to help readers understand better installation and configuration procedures proposed by MAPEER.
4. Minor corrections.
